## PRODUCTION *Workshop*

生产车间

电脑数控全自动化生产能最大程度提高生产效率，减少手工带来的误差从而提高产品质量与降低生产成本。因此，我们不断引进最先进的生产设备与技术工艺，同时引入完善的生产管理体系，使我们的生产能力和加工精度得到极大的提高，从而保证产品质量的长期稳定。

Computer numerical control fully automated production can maximize production efficiency and reduce errors caused by manual work to improve product quality and reduce production costs. Therefore, we continue to introduce the most advanced production equipment and technology, and at the same time introduce a complete production management system, so that our production capacity and processing accuracy have been greatly improved, so as to ensure the long-term stability of product quality.

## HONOR *Certificate*

每个荣誉的背后都有一段艰辛的里程。产品以其上乘的品质，既科学又环保的特点，受到专业领域和广大消费者的认可，先后获得了不少荣誉称号。每一份的支持，每一份的信赖都是我们前进的最大动力。我们一如既往不懈努力，再创佳绩。

Behind every honor is a arduous mileage. The products are recognized by professional fields and consumers for their superior quality, scientific and environmentally friendly features, and have won many honorary titles. Every piece of support and every piece of trust is the biggest driving force for us to move forward. We will continue to make unremitting efforts to achieve better results.

Series  
introduction

## 系列介绍

铝单板，是当今铝质建材产品中的深度加工系列产品。采用优质铝合金板材为基材，再经过数控折弯等技术加工成型，表面喷涂装饰性涂料的一种新型幕墙材料。铝单板在外墙装饰应用中已成为一个不可缺少的幕墙家族成员。

铝合金板材深加工性能优越，可塑性强，易于加工成各种形状，而采用加强筋的技术改善了铝单板受风荷载的承载力，使铝单板做成超常规尺寸成为可能。

表面涂层采用氟碳粉末，使铝单板具有卓越的耐候性能，也使亮丽色彩得到长久性的延续，让建筑传递出一种与众不同的现代感。

Aluminum veneer is a series of deep processing products in today's aluminum building materials products. It is a new type of curtain wall material that uses high-quality aluminum alloy sheet as the base material, and then is processed and formed by CNC bending and other technologies, and the surface is sprayed with decorative paint. Aluminum veneer has become an indispensable member of the curtain wall family in the application of exterior wall decoration.

The aluminum alloy sheet has excellent deep processing performance, strong plasticity, and is easy to be processed into various shapes. The technology of using stiffeners improves the ability of the aluminum veneer to receive wind loads, making it possible to make the aluminum veneer into an unconventional size.

The surface coating is made of fluorocarbon powder, which makes the aluminum veneer have excellent weather resistance, and also makes the bright color continue for a long time, so that the building conveys a distinctive modern feeling.

## PUNCHED Aluminum veneer

### 冲孔铝单板

#### 产品介绍 Product description

冲孔铝单板的孔状主要有长方孔、圆孔、方孔、三角孔、椭圆孔、五角星孔等。其中圆孔和椭圆孔是应用较多的孔状。孔状可根据客户需求生产，冲孔铝单板中可布阵不同形状及大小的孔，生产出具有浓厚艺术气息的冲孔板。冲孔铝单板除了孔状、孔径、布阵外，还可有独特的色彩，颜色能给冲孔铝单板增添不少活力，可让冲孔板更具个性化。

The hole shapes of punched aluminum veneer mainly include rectangular hole, round hole, square hole, triangular hole, elliptical hole, Pentagon star hole, etc., among which round hole and elliptical hole are more widely used. The hole shape can be produced according to the needs of customers. Holes of different shapes and sizes can be arranged in the punched aluminum veneer to produce punched plates with strong artistic flavor. In addition to the hole shapes, aperture and layout, the punched aluminum veneer can also have unique colors. The color can add a lot of vitality to the punched aluminum veneer and make the punched plate more personalized.

冲孔铝单板是一种常见的建筑墙面装饰板，表面以冲孔造型的形式赋予了装饰板更多的表现空间。冲孔铝单板时尚与个性并存，富有艺术特色。配以不同颜色和形状各异的冲孔，则会营造出独特的氛围，更会提升建筑的层次感和现代感。

Perforated aluminum veneer is a common architectural wall decoration board, and the surface is given more expression space in the form of punching shape. The punched aluminum veneer coexists with fashion and individuality, and is full of artistic characteristics. With punching holes of different colors and shapes, it will create a unique atmosphere and enhance the layering and modernity of the building.

### 雕花铝单板

雕花铝单板是以高等级铝合金为主要材料，按照工程现场设计的尺寸、形状和构造形式，经过数控折弯等技术成型，确保板材在加工后能平整不变形，并在其表面氟碳喷涂的基础上，制作间距比例大小一致的网格的一种高档金属装饰材料。雕刻板更能满足客户对美的追求，可根据个性风格定做。

Engraving board is a kind of high-grade metal decoration material with high-grade aluminum alloy as the main material, which is formed by NC bending and other technologies according to the size, shape and structural form designed on the project site, so as to ensure that the board can be flat without deformation after processing, and make a grid with the same spacing proportion on the basis of fluorocarbon spraying on its surface. Engraving board can better meet customers' pursuit of beauty and can be customized according to individual style.

#### 适用范围

适用于飞机场（火车站、地铁站、候车大厅、运动场馆、办公室、写字楼、餐厅、酒吧、超市、商场、饭店）酒店大厅等场所内外墙。

#### SCOPE OF APPLICATION

It is applicable to the internal and external walls of airports (railway stations, subway stations, waiting halls, sports venues, offices, office buildings, restaurants, bars, supermarkets, shopping malls, restaurants), hotel halls and other places.

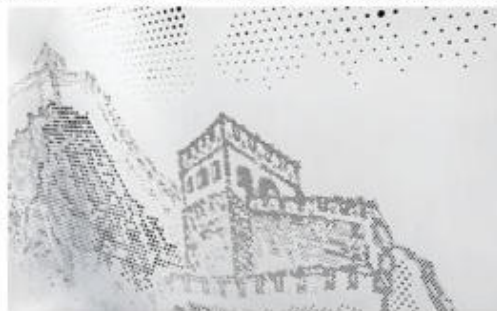

## ART PUNCH *aluminum veneer*

### 艺术冲孔铝单板

#### 产品介绍 Product description

艺术冲孔铝单板, 凭借先进的生产技术和设备, 力求成为个性化和艺术化的新一代主流产品。环保无毒, 完全防火; 款式多样化, 图案可根据风格定制, 尽显个性化; 表面立体感强; 抗静电不吸尘且容易清洗等。且安装简单, 易装易拆, 维修方便。

Art punching aluminum veneer, With advanced production technology and equipment, strive to become a personalized and artistic new generation of mainstream products, environmental protection, non-toxic and complete fire prevention; The styles are diversified, and the patterns can be customized according to each style, showing personalization; Strong surface stereoscopic sense; Antistatic, no dust collection and easy to clean. The utility model has the advantages of simple installation, easy assembly and disassembly and convenient maintenance.

# ART PUNCH aluminum veneer

艺术冲孔铝单板

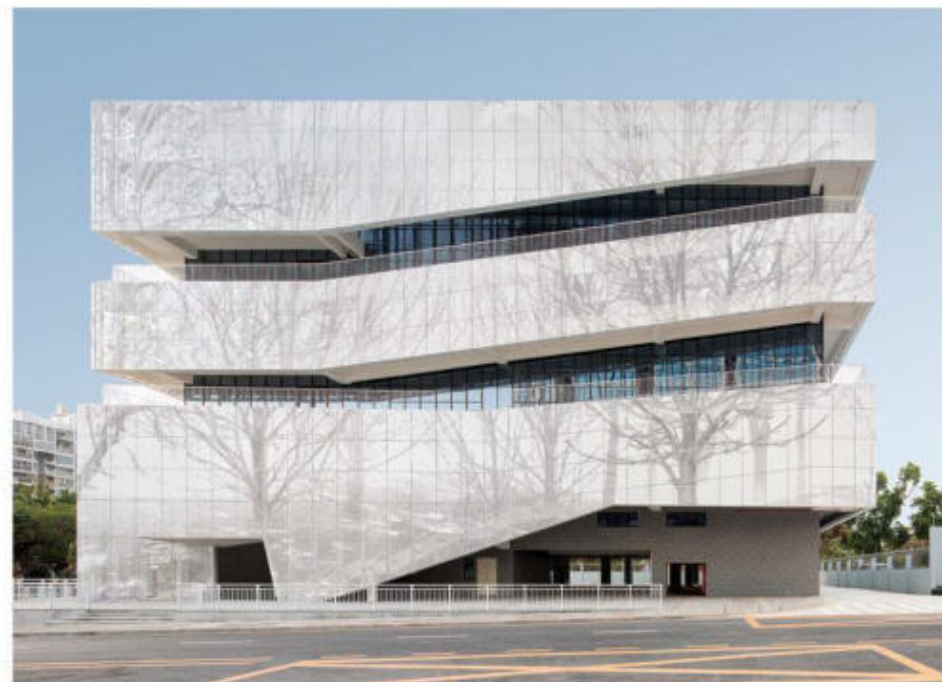

## APPLICATION AREA

### 应用领域

用于各种建筑内外墙、大堂门面、柱饰、高架走廊、人行天桥、电梯包边、阳台包边、广告指示牌、室内异形吊顶等的装饰。

Suitable for all kinds of building external walls, the lobby facade, column, elevated corridors, pedestrian bridge, elevators bag, balcony package while, widely scenery signs, indoor decoration alien condole top, etc.

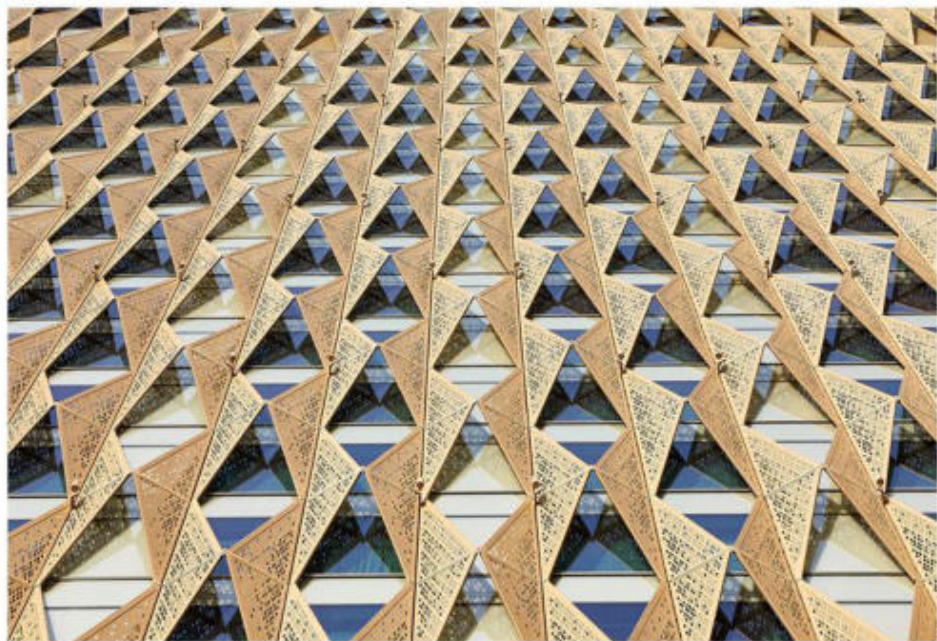

## SHAPED *Aluminum veneer*

### 造型铝单板

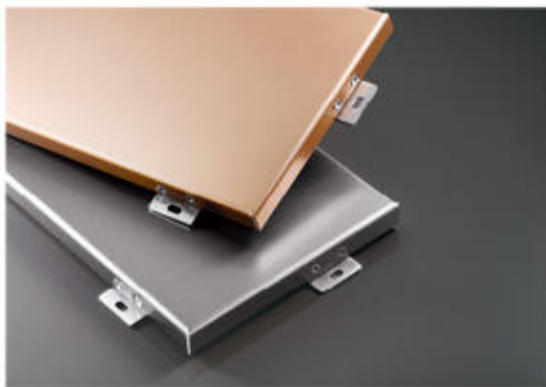

造型铝单板，是根据特定的设计要求，采用精密加工工艺，通过裁料、折边、开槽、冲角、焊接、打磨、后喷涂等复杂的加工过程加工而成的特殊形状建筑铝材料。采用双A高标准幕墙专用单层铝合金板，造型板的出现弥补了传统造型单一的不足，其设计独特创新，能根据空间的位置不同设计不同的装饰风格，充满现代时尚气息，展现了空间强烈的立体感。优质的材料与生产工艺确保了产品的平整度，色泽新颖，不易褪色。

Shaped aluminum veneer is a special-shaped building material processed through complex processing processes such as cutting, folding, grooving, angle punching, welding, grinding, and post-spraying according to specific design requirements. The single-layer aluminum alloy plate specially used for the double A high standard curtain wall is adopted. The appearance of the modeling board makes up for the lack of traditional modeling. Its design is unique and innovative, and it can design different decorative styles according to the location of the space. It is full of modern fashion and shows a strong three-dimensional sense of space. High-quality materials and production processes ensure the flatness of the product, novel color and not easy to fade.

# ANODIZED Aluminum plate

## 阳极氧化铝板

### 产品介绍 Product description

阳极氧化是一种电化学过程，使铝材表面发生变化，形成一层高硬度的透明膜。这项工艺可以与电泳上色工艺结合，在铝材表面形成一系列耐紫外线的颜色层或涂上同等耐紫外线的有机上色层。而形成的阳极氧化膜或“氧化膜”依然 100% 是铝，铝的回收利用率完全没有折扣。其效果就是获得了一层非常耐久的，抗腐蚀的铝产品。保持了铝的所有天然特性和自然光泽。

阳极氧化铝板广泛用于金属铝天花板、幕墙板、铝塑面板、防火板、蜂窝铝板、铝单板、电器面板、电梯轿厢、橱柜面板、家具面板等领域。

Anodizing is an electrochemical process that changes the surface of aluminum to form a high-hardness transparent film. This process can be combined with the electrolytic coloring process to form a series of UV-resistant color layers on the aluminum surface or an organic color layer with the same UV resistance as paint. The formed anodic oxide layer or "oxide film" is still 100% aluminum, and the recycling rate of aluminum is not compromised at all. Features and natural radiance.

Anodized panels are widely used in metal aluminum ceilings, curtain wall panels, aluminum-plastic panels, fireproof panels, honeycomb aluminum panels, aluminum veneers, electrical panels, elevator cars, cabinet panels, furniture panels and other fields.

### 阳极氧化铝板产品结构 Anodized aluminum plate product structure

# CURTAIN WALL Aluminum veneer

## 幕墙铝单板

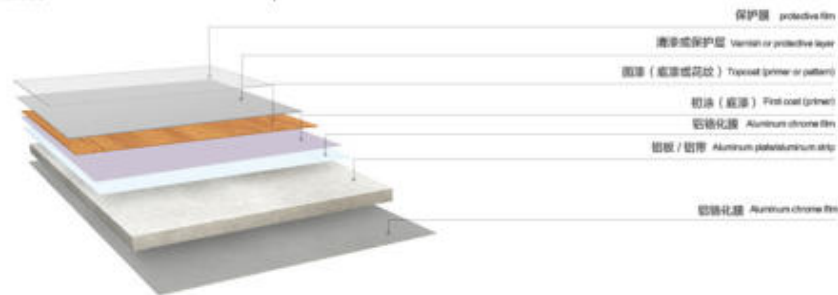

### 产品介绍 Product description

幕墙铝单板表面一般经过六遍碱洗水洗，两遍硅烷水洗处理，再采用氟碳喷涂处理。氟碳漆料分为底漆、面漆和清漆，主要成份为聚偏氟乙烯树脂 (KYNAR500)。氟碳涂层具有卓越的抗腐蚀性、耐候性，能抗酸雨、盐雾和各种空气污染物等，耐冷热性能很好，能抵御强烈紫外线的照射，能长期保持不褪色、不粉化，使用寿命长。表面选用世界知名的氟碳漆料生产商 PPG、DNT、AKZO、NIPPON 等公司的优质氟碳漆料，颜色选择广泛，客户直接按厂家提供的色板选用或提供色板样。

The surface of the aluminum veneer of the curtain wall generally undergoes six alkaline washings and two silane washings, and then is treated with fluorocarbon spraying. Fluorocarbon coatings are divided into primers, topcoats and varnishes, and the main component is polyvinylidene fluoride resin (KYNAR500). Fluorocarbon coating has excellent corrosion resistance and weather resistance, can resist acid rain, salt spray and various air pollutants, etc., long service life. The surface is made of high-quality fluorocarbon coatings from world-renowned fluorocarbon coating manufacturers such as PPG, DNT, AKZO, NIPPON, etc., with a wide range of colors. Customers can directly select or provide color samples according to the color palette provided by the manufacturer.

## Aluminum veneer

### 包柱铝单板

#### 方形有缝包柱 Square seamed post

以前认为是阻碍的方柱，设计师将其变成美丽的风景。这不仅是现代装饰的不断发展，更是建材领域不断革新的结果。方形有缝包柱让简单的柱变成一个独特的视觉亮点。

The square column, which was previously thought to be an obstacle, was transformed into a beautiful landscape by the designer. This is not only the continuous development of modern decoration, but also the result of continuous innovation in the field of building materials. The square seamed column turns a simple column into a unique visual highlight.

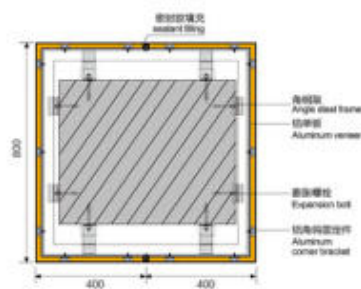

#### 方形无缝包柱 Square seamless cladding

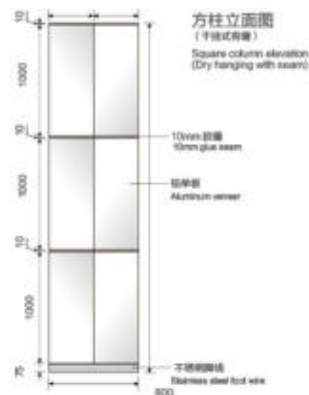

方形无缝包柱铝单板的应用为大型装饰空间提供了一个整体简洁的视觉空间；尤其是变幻莫测的建筑设计中，平整反而成了视觉一个缓冲点，常常给人们带来不平凡的惊喜与享受。

The application of square seamless column-coated aluminum veneer provides an overall concise visual space for large-scale decorative spaces; especially in unpredictable architectural designs, flatness has become a visual buffer point, which often brings people extraordinary surprises. Surprise and enjoyment.

安装示意图 Installation diagram

方柱子剖面图 (干挂式)

#### 圆形有缝包柱 round seamed post

圆形有缝包柱以高等级铝合金为主要材料，经过裁剪、折边、弯弧、焊接、加筋、打磨、喷涂等多种加工工艺处理后形成的金属装饰产品。包柱铝单板具有优良的耐候性能，色彩可选性广，装饰效果极佳。

The circular seamed column is made of high-grade aluminum alloy as the main material, and is a metal decorative product formed by cutting, folding, arc bending, welding, reinforcing, grinding, spraying and other processing processes. The column-coated aluminum veneer has excellent weather resistance, wide color options, and excellent decorative effect.

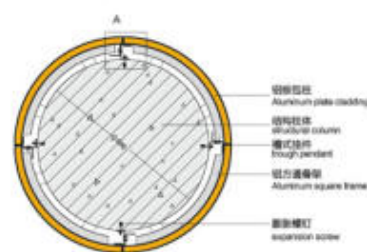

#### 圆形无缝包柱 Round seamless cladding

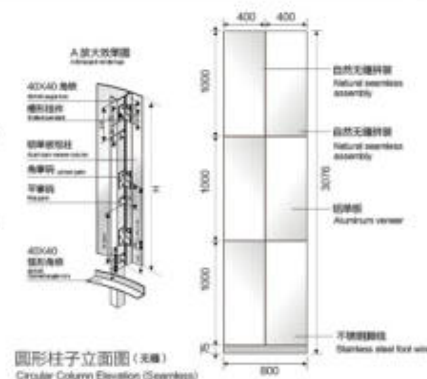

圆形无缝包柱表面采用氟碳漆喷涂，具有超强的耐候性和耐紫外线性能，色彩和光泽保持长久，耐腐蚀性好，具有重量轻、强度高、韧性好、易加工等特点符合环保要求。

The surface of the round seamless cladding column is sprayed with fluorocarbon coating, which has super weather resistance and ultraviolet resistance, long-lasting color and gloss, good corrosion resistance, light weight, high strength, good rigidity, and easy processing. Environmental requirements.

## EMBOSSED *Aluminum veneer*

### 浮雕铝单板

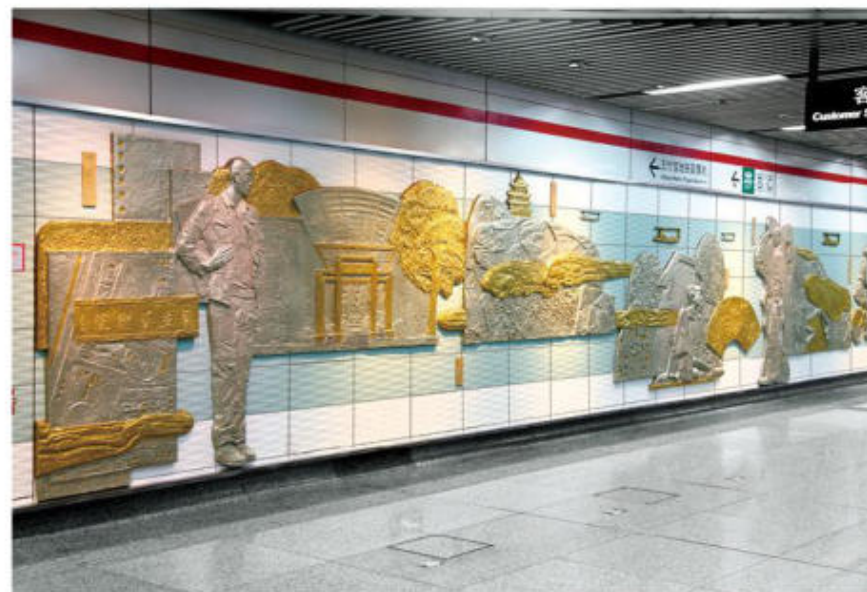

由于铝图案浮雕板本身具备很强的艺术装饰效果和立体视觉感，而且具备防水防晒、轻质抗震、施工便捷、隔音降噪、绿色环保、美观耐久等特性。同时因其板体组装方式简单实用，不受季节环境限制，因此安装使用非常安全方便，四季皆宜。这种革新金属浮雕板凸现了其绝对的材料及艺术装饰性能优势。

Because the aluminum pattern embossed board itself has a strong artistic decorative effect and a sense of three-dimensional vision, and has the characteristics of waterproof and flame retardant, light weight and shock resistance, convenient construction, sound insulation and noise reduction, green environmental protection, beautiful and durable, etc. The method is simple and practical, and is not restricted by the seasonal environment, so the installation and use are very safe and convenient, and it is suitable for all seasons. This innovative metal embossed plate highlights its absolute material and artistic decorative performance advantages.

该建材既适用于新建的砖混结构、框架结构、剪力墙、轻体房等类型的建筑，也适用于既有建筑的艺术装饰。金属浮雕板正在成为越来越多墙体及天花艺术装饰建材的首选。

The building materials are not only suitable for newly-built brick-concrete structures, frame structures, steel structures, light-body buildings and other types of buildings, but also for artistic decoration of existing buildings. Metal embossed panels are becoming the first choice for more and more wall and ceiling art decorative building materials.

### 拉网铝单板

#### 产品介绍 Product description

拉网铝单板具有开放、透明的视野；是一种可用于多种建筑设计，视觉效果独特的吊顶系统。在样式、材质和颜色方面有广泛的选择，可以确保每个项目拥有独特的外观。拉网铝单板是通过特殊的制造工艺在金属薄片表面同时进行切割和拉伸，制作出菱形网孔。通过网孔形状、网孔方向以及照明和颜色的变化，可以将吊顶表现得更加通透和富有动感。不同的网孔类型和材质，使吊顶设计更加富有个性、更具有时尚气息。

The ceiling has a transparent and metal vision; it is a ceiling system with unique visual effect that can be used in a variety of architectural design. A wide selection of styles, materials and colors ensures that each item has a unique appearance. The metal mesh is cut and stretched simultaneously on the surface of the metal sheet through a special manufacturing process to produce diamond mesh. Through the changes of mesh shape, mesh direction, lighting and color, the ceiling can be more transparent and dynamic. Different mesh types and materials make the ceiling design more personalized and fashionable.

金属网板是通过特殊的制造工艺在金属薄片表面同时进行切割和拉伸，制作出菱形网孔。通过网孔形状、网孔方向以及照明和颜色的变化，可以将吊顶表现得更加通透和富有动感。不同的网孔类型和材质，使吊顶设计更加富有个性、更具有时尚气息。

The metal mesh is cut and stretched at the same time on the surface of the metal sheet through a special manufacturing process to produce a diamond-shaped mesh. Through the change of mesh shape, mesh direction, lighting and color, the suspended ceiling can be expressed more transparent and dynamic. # PAINTED aluminum veneer

## 彩绘铝单板

### 产品介绍 Product description

彩绘铝单板的发展从单一的板材，逐渐增添了绚丽的色彩，然后慢慢发展出了镂空雕刻造型等丰富的结构。彩绘铝单板可以将喜欢的图案、画作通过电脑打印在铝单板板面上。通过排版拼接可以在室内外墙上展现一整幅画作造型。彩绘铝单板不仅仅可以在平整的面板上体现，还可以搭配冲孔等其他造型。

The development of painted aluminum veneer has gradually added bright colors from a single plate, and then slowly developed a rich structure such as hollowed-out carving shapes. The painted aluminum veneer can print your favorite patterns and paintings on the aluminum veneer surface through the computer. Through typesetting and splicing, a whole painting can be displayed on the indoor and outdoor walls. The painted aluminum veneer can not only be reflected on the flat panel, but also can be matched with other shapes such as punching.

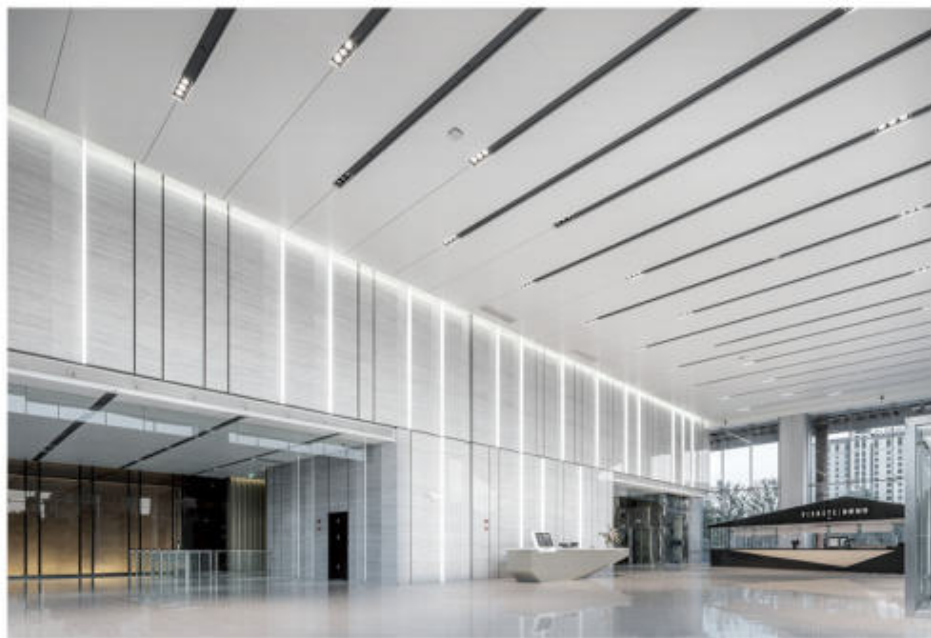

### 应用领域 Application field

彩绘铝单板适用于设备繁多及人流较多的区域，如地铁、机场、车站、通道、剧院、现代大型购物中心、展览中心、停车场等大型开放式公共场所。建筑幕墙外墙挂板，室内装修造型，高档家居装饰，广告装饰等方面。

Painted aluminum veneer is suitable for areas with a lot of equipment and a lot of people, such as subways, airports, stations, passages, theaters, modern large shopping centers, exhibition centers, car parks and other large open public places. Building curtain wall exterior wall hanging board, interior decoration modeling, high-end home decoration, advertising decoration and so on.

# HOOK UP Aluminum veneer

## 勾搭铝单板

### 产品特点 Features

#### 灵活简装

勾搭板根据实际空间的需要，灵活设计天花板板的尺寸。固定龙骨系统后，可徒手装卸，不需任何辅助工具，灵活简装。

#### 密拼性强

单向平行龙骨勾搭式结构，使龙骨有次序地搭折在一起，独特的勾搭设计，有效地控制板与板之间的活动性，确保缝更严密平整。

#### 适用范围

勾搭板尤其适合于机场、走廊、大堂和出入口以及天花系统活动性要求更高的地方。

#### Flexible and simple

The size of the ceiling slab surface shall be flexibly designed according to the needs of the actual space. After fixing the keel system, it can be loaded and unloaded by hand without any auxiliary tools, which is flexible and simple.

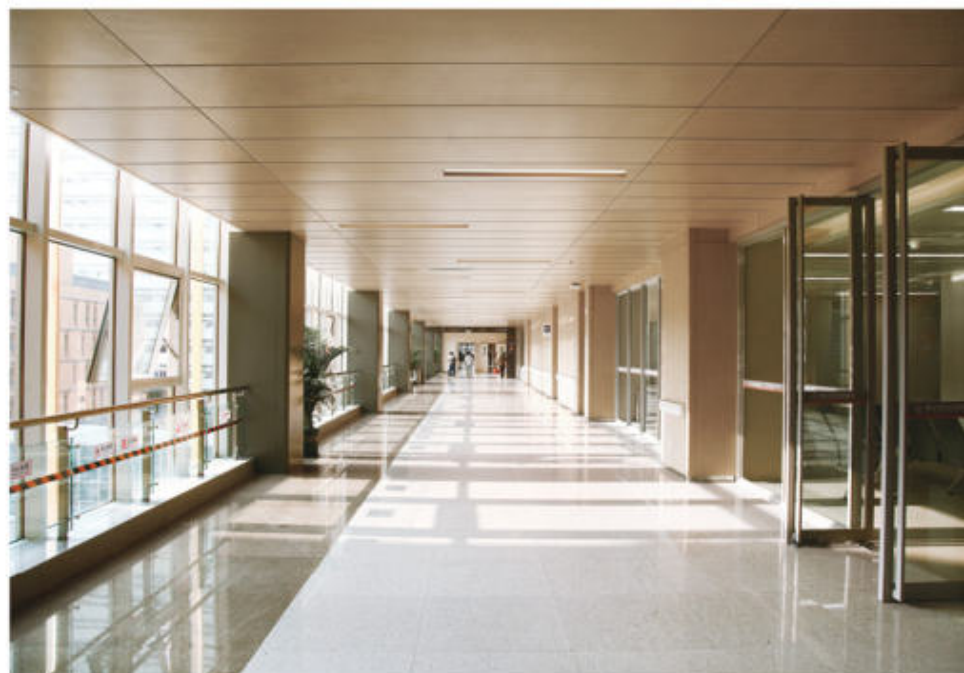

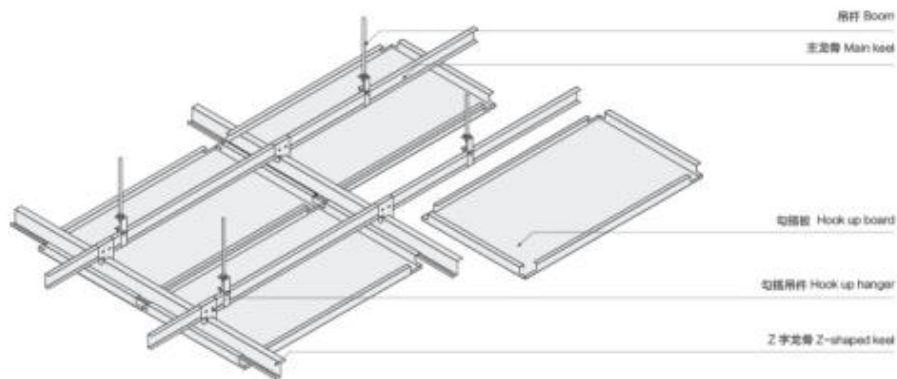

#### Strong close fitting

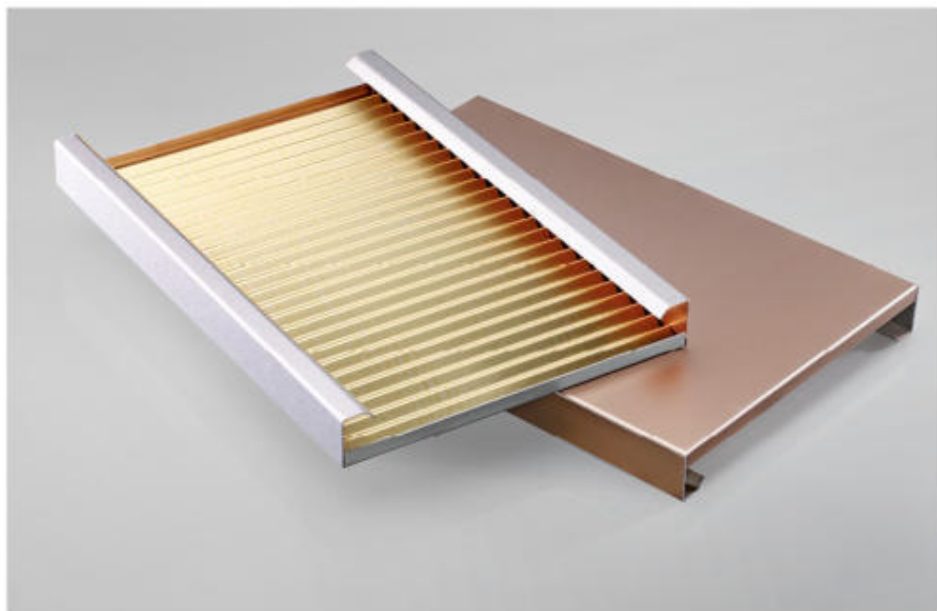

The one-way parallel keel overlapping structure enables the keel to be folded together in order. The unique overlapping design effectively controls the mobility between plates and ensures that the gap is more tight and flat.

#### Scope of application

The hook up board is especially suitable for airports, corridors, lobbies, entrances and exits, and places with higher activity requirements of ceiling system.

### 勾搭铝单板产品结构 Hook up aluminum veneer product structure

# CORRUGATED *Aluminum veneer*

## 瓦楞铝单板

### 产品介绍 Product description

瓦楞板厚度为 0.8~1.5mm 的铝板，背面为瓦楞状的钢板或铝质材料，采用氟碳树脂涂料和双组份户外静电粉末涂料，最大强度上保证铝板和背板的粘接强度并均匀复合。

### 铝表面涂层：

采用氟碳树脂涂料，能够有效抵抗酸雨、空气污染及紫外光的侵蚀，具有使用寿命长、吸附能力强、光泽度好、耐老化、不变色等特点。

### 表面平整：

可以作为大跨度装饰面板而不变形，表面涂层均匀一致，易清洗；色彩丰富，隔音、隔热性能好，具绝佳的防火性能，达到防火 A 级。

### 适用范围：

被广泛应用于剧院、音乐厅、展厅、体育馆等大型现代公共建筑中。

The surface layer of the corrugated board is 0.8~1.5mm aluminum plate, and the back is corrugated steel plate or aluminum material. The fluorocarbon resin coating and two-component outdoor electrostatic powder coating are used to ensure the maximum strength between the aluminum plates. The bonding strength and uniform composite.

### Aluminum Surface Coating:

The use of fluorocarbon resin coating can effectively resist acid rain, air pollution and ultraviolet light erosion, and has the characteristics of long service life, strong adsorption capacity, good gloss, aging resistance, and no discoloration.

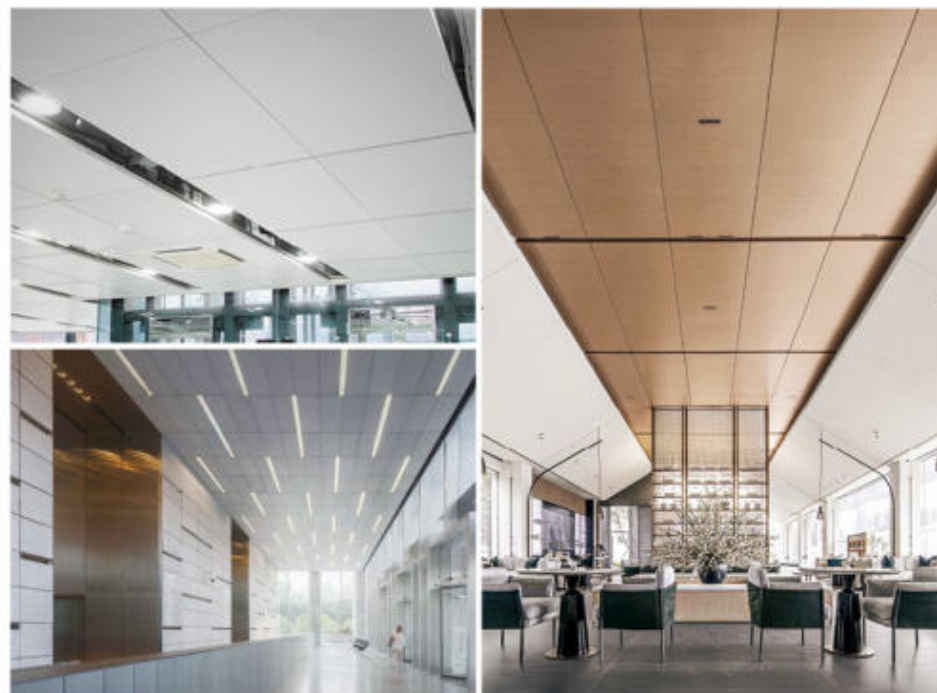

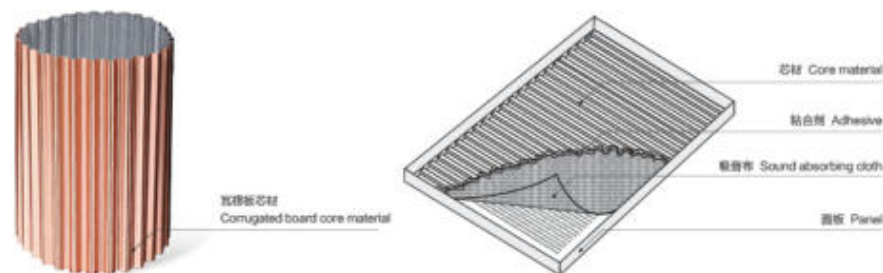

### Flat surface:

It can be used as a large-scale decorative panel without deformation, the surface coating is uniform and easy to clean; it is rich in color, has good sound insulation and heat insulation performance, and has excellent fire resistance, reaching fire protection class A.

### Scope of application:

It is widely used in large modern public buildings such as theaters, concert halls, exhibition halls, gymnasiums, etc.

## 系列介绍

铝方通系列是以铝合金或预辊涂铝合金为基材，采用辊压成型工艺或折弯成型工艺加工而成。是一种装饰性屏蔽型天花，线条明快飘逸，层次分明、整体通透；选用适当的高度，以适当视角，给人以独特的帘幕效果。产品多样化及样式丰富的冲孔和面板组合，实现不同功能与效果要求。

规格多种多样，可任意组合；颜色丰富，表面处理多样；结构精巧，经久耐用，装卸简便；良好的吸音减震性能，防火阻燃性能优异；绿色环保，可回收利用率高；

创造出简洁典雅、明快大方、庄重大气的设计风格，还能充分体现现代建筑的完整性。

The aluminum square pass series is made of aluminum alloy or pre-rolled aluminum alloy as the base material, and is processed by the roll forming process or the bending forming process. It is a decorative barrier type ceiling, with bright and elegant lines, distinct layers, and overall transparency; selecting the appropriate height and viewing angle can give people a unique curtain effect. Diversified products and rich styles of punching and panel combinations can achieve different functions and effect requirements.

Various specifications, can be combined arbitrarily; rich colors, various surface treatments; exquisite structure, durable, easy to install and unfold; good sound absorption and shock absorption performance, excellent fire and flame retardant performance; green environmental protection, high recycling rate;

Create a simple and elegant, bright and generous, solemn and elegant design style, but also fully reflect the integrity of modern architecture.

### 幕墙铝方通

#### 产品介绍 Product description

幕墙铝方通以高等级铝合金为主要材料，经过切割、挤压、喷涂等生产工艺处理成型。铝方通吊顶具有通透的结构，优良的排气效果，采用单向条板安装，形成单向视觉，造型美观、线条明快飘逸，简约大方，若该现场选用薄度，其空间的视觉角度则能产生幕布的效果，令设计变化万千，整个建筑空间宽敞通透，更具有天花行业的时尚感。幕墙铝方通吊顶安装便捷，且便于对上部的消防喷淋和照明设备进行安装和维护，适用于现代而简洁的开放式公共区域。

The aluminum square tube takes high-grade aluminum alloy as the main material and is formed through cutting, extrusion, spraying and other production processes. The aluminum square pipe ceiling has a transparent structure and excellent exhaust effect. It is installed with one-way strips to form a one-way bottle level vision. It has beautiful shape, bright and elegant lines, and is simple and generous. If it is suitable for the height of the site, the visual angle of the space can produce the effect of the curtains, which makes the design change thousands of times. The whole building space is spacious and transparent, and has the sense of fashion of the ceiling industry.

The installation of aluminum square pipe ceiling is convenient, and it is convenient for the installation and maintenance of the upper fire sprinkler and lighting equipment. It is suitable for modern and simple open public areas.

### 凹槽方通

#### 产品介绍 Product description

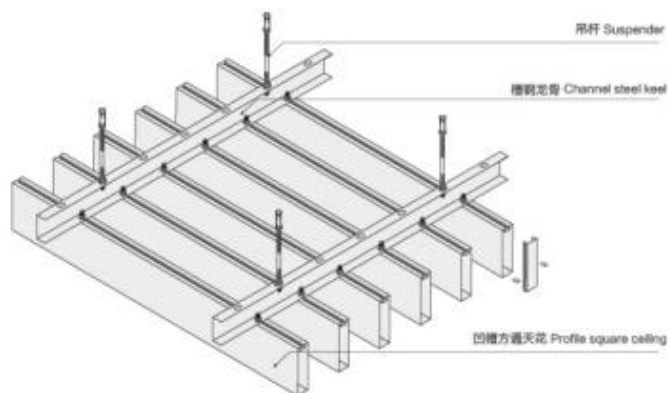

凹槽方通由优质铝材通风挤压成型，产品硬度，直线度远远超过其它方通产品。铝型材方通安装结构为利用上層主骨，以螺丝和特造的构件与型材慢片连接，防风性强，适用于户外装饰（龙骨间距可任意调节）。特殊的型材方通可拉弯成弧形，也可以做成造型，弧形，造型铝方通的出现为设计师提供更为广阔的构想空间，以创造出更独特美观的作品。

安装不同的型材铝方通是可以选择不同的高度和间距，可一高一低，一疏一密，加上合理的颜色搭配，令设计千变万化，能够设计出不同的装饰效果。同时，由于凹槽方通是通透式的，可以把灯具，空调系统，消防设备置于天花板内，以达到整体一致的完美视觉效果。

The grooved square pass is formed by high-quality aluminum ventilation and extrusion. The hardness and straightness of the product far exceed other square pass products. The installation structure of the aluminum profile square pass is to use the upper main bone and connect it with the profile hammer with screws and special components. Strong wind resistance, suitable for outdoor decoration (the keel spacing can be adjusted arbitrarily). The special profile aluminum square pass can be down and bent into an arc shape, and can also be made into a shape. The appearance of the arc and shape aluminum square pass provides designers with a broader space for ideas to create more unique and beautiful works.

Different heights and spacings can be selected for the installation of different profiles, including one high, one low, one sparse and one dense. With reasonable color matching, the design is ever-changing, and different decorative effects can be designed. At the same time, since the aluminum square pass of the profile is transparent, lamps, air-conditioning systems and fire-fighting equipment can be placed in the ceiling to achieve a consistent and perfect visual effect.

### 子弹头方通

#### 产品介绍 Product description

子弹头型方通是由铝材通过挤压成型，产品硬度，直线度远远超过其它产品。整体效果良好，多数型号需要定制模具再生产。子弹头型方通形状不规则，线条有起伏，需要烧焊等特殊工序打造，产品一般需要较多的人工和时间，而且材料消耗比较大，需要采用较厚的材料。

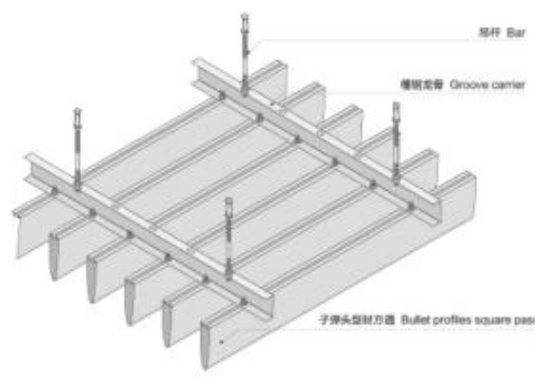

广泛应用于地铁站、高铁站、车站、机场、大型购物中心、通道、休闲场所、公共卫生间、建筑物外墙等开放式场所。

Bullet profiles square pass is made by aluminum extrusion forming, hardness straightness is far more than other products, the overall effect is good, most of the models need to custom-made mold reproduction. Irregular shape, dynamic line, it need to welding and other special process, generally need more artificial and time, and materials consumption is bigger, need to use thicker material.

Application in subway station, high MTR station, railway stations, airports, large shopping mall, channel, leisure place, public toilet, building external wall and open place.

## 铝圆管

### 产品介绍 Product description

铝圆管天花具有开放的视野，其圆边式的线条明快柔和，安装后整个空间和走廊美观而不乏流畅的立体线条感，现代感效果非常好，且通风、透气。每条圆管都是独立的，可随意安装与拆卸，无须特别工具，方便维护和保养。

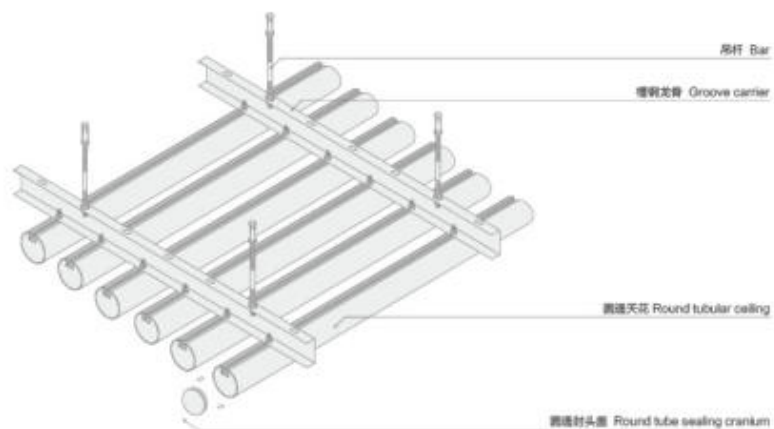

适用范围 广泛应用于地铁站、高铁站、车站、机场、大型购物中心、通道、墙面装饰、建筑外墙等。

The aluminum circular tube ceiling has an open field of vision, and its rounded-edge lines are bright and soft. After installation, the whole space is harmonious and soft without lack of smooth three-dimensional lines. The modern effect is very good, and it is ventilated and breathable. Each Yuanlong is independent and can be installed and disassembled at will without special tools, which is convenient for maintenance and maintenance.

Scope of application: Widely used in subway stations, high-speed railway stations, stations, airports, large shopping malls, passages, wall decoration, building exterior walls, etc.

# ARC Aluminum square

## 弧形铝方通

### 产品介绍 Product description

弧形铝方通产品具有开放的视野，呈现出复杂而精致的奇特效果，造型优美、工艺精细、高贵大方、结构均匀、立体感强，安装在整个空间和温柔美，现代感效果非常好。还可根据客户要求，订做不同图案、颜色、造型。

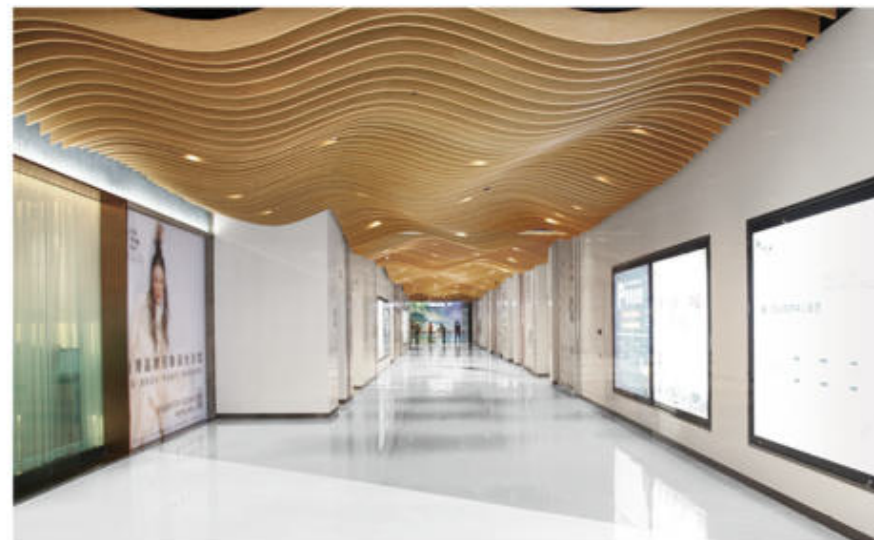

ARC aluminum Fangtong products have an open vision, showing complex and exquisite strange effects, beautiful shape, fine technology, noble and generous, uniform structure and strong three-dimensional sense. After installation, the whole space is harmonious and soft, and the modern effect is very good. We can also customize different patterns, colors and shapes according to customer requirements.

### 应用领域 Application field

广泛应用于各种住宅、别墅、酒店、会所、商场、写字楼等室内装饰工程，更可取代传统的天花板，营造出高雅优雅、别具一格、立体感极强的商住休闲空间。

It is widely used in various indoor decoration projects such as residences, villas, hotels, clubs, shopping malls, office buildings, etc., and can replace traditional ceilings to create a high-end elegant, unique, and strong three-dimensional business residential leisure space.

### 树型铝方通

#### 产品介绍 Product description

树型铝方通安装不同的铝方通是可以选择不同的高度和间距，可一高一低，一疏一密，加上合理的颜色搭配，令设计千变万化，能够设计出不同的装饰效果。由于铝方通是通透式的，可以把灯具、空调系统、消防设备置于天花板上，以到达整体一致的完美视觉效果。

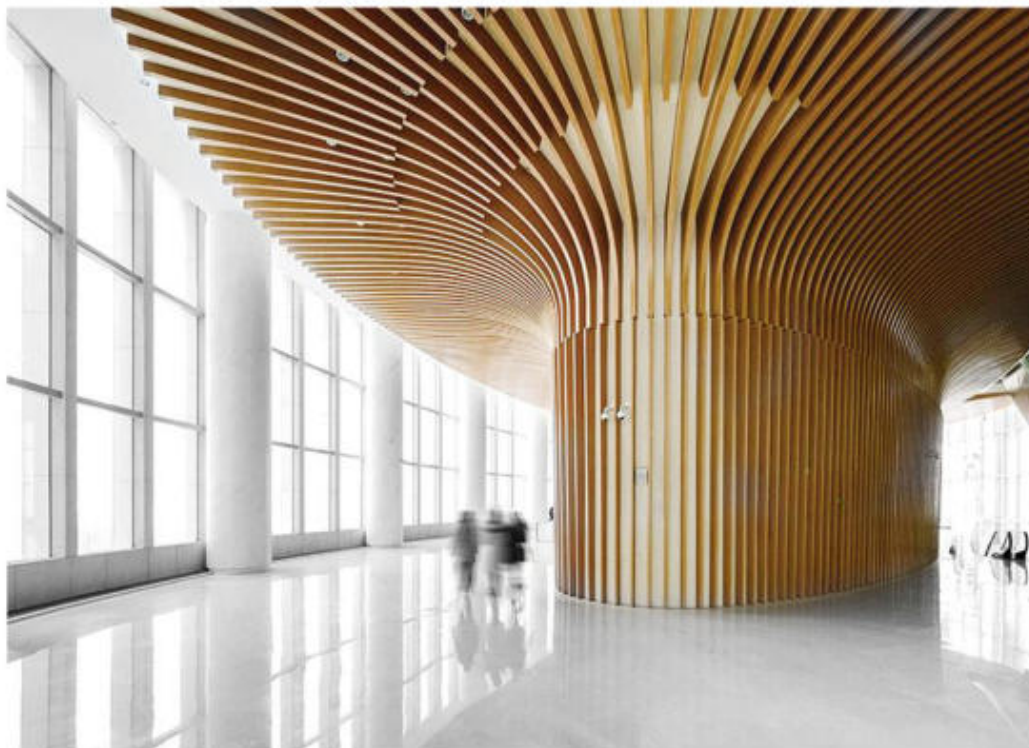

铝树方通线条流畅，美观大方，装饰后使空间具有和谐美感，别具一格的风采使其风靡装饰建材市场。铝树方通是吊顶装饰最新产品，结构简单，拼装自由，能组合各种造型。

铝树方通的表面处理主要有以下几种：喷涂、烤漆、滚涂。适用于酒店、商场、商业建筑、行政楼、超市等各种公共场所。

Aluminum tree square pass installation Different aluminum square pass can choose different heights and spacings, one can be high, one low, one sparse and one dense, coupled with reasonable color matching, the design is ever-changing, and different decorative effects can be designed. Since the aluminum square pass is transparent, lamps, air-conditioning systems, and fire-fighting equipment can be placed in the ceiling to achieve a consistent and perfect visual effect.

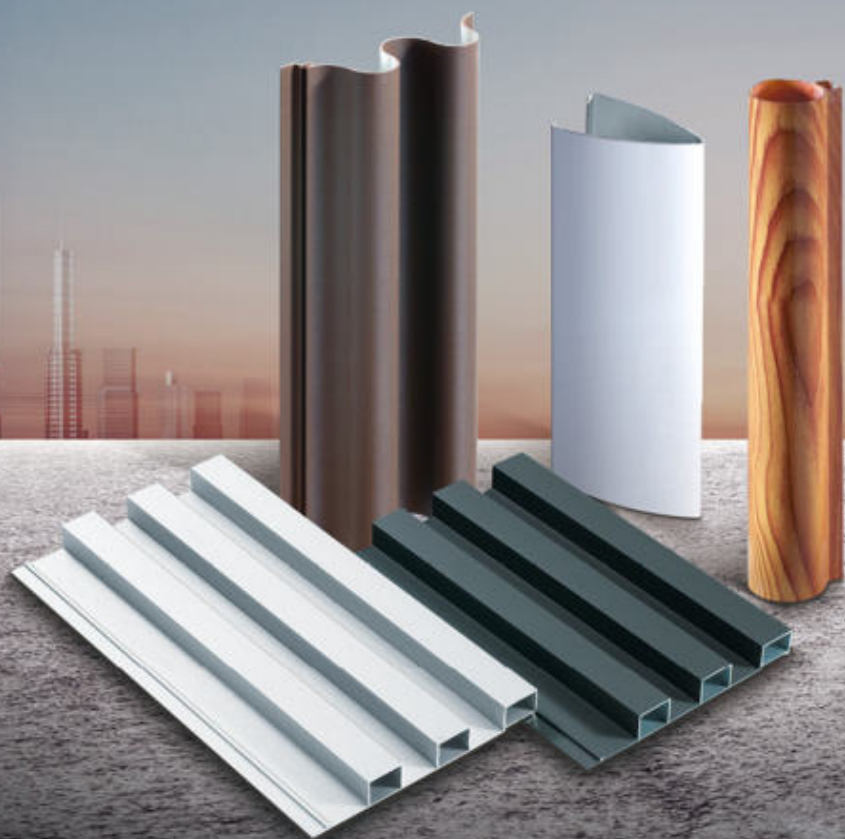

The aluminum tree square pass has smooth lines and elegant appearance. After decoration, the space has a harmonious beauty, and its unique style makes it popular in the decorative building materials market. Aluminum tree square pass is the latest product of ceiling decoration, with simple structure, free assembly, and can be combined with various shapes.

The surface treatment of aluminum tree square pass mainly includes the following: spraying, baking paint, roller coating. Suitable for hotels, shopping malls, commercial buildings, administrative buildings, supermarkets and other public places.

# ALUMINUM Profile Series

铝型材系列

## 系列介绍

铝型材系列，面板规格多样化，种类繁多可按设计思路，随心所欲的进行空间布置，使设计变得简单多样。通过板面的延伸，创造出具有线条导向的空间效果。完美的体现空间层次感与立体感，为现代建筑装饰增添了实用与美感。

铝型材系列，极具方向性，通透开阔，立体感强烈，棱角线条清晰明朗，新颖独特。可调节装饰空间视觉高度，搭配各种不同颜色，悬挂不等高度，引入不同灯光效果，相得益彰，展现明快、飘逸、时尚、完美的装饰风格。

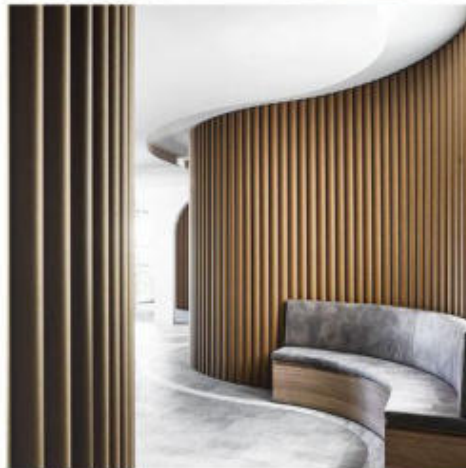

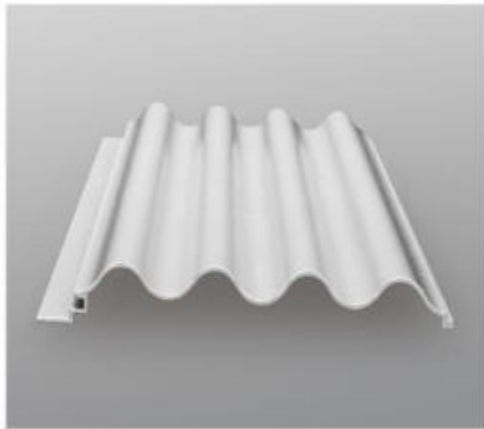

加以防风网安装结构，应用于室外装饰能有效防风，效果更鲜明。通透的安装方法，拆装简单快捷。

The aluminum profile series, the panel specifications are diversified, and the variety can be arranged according to the design thinking, making the design simple and diverse. Through the extension of the board surface, a line-oriented space effect is created. It perfectly reflects the sense of space and layering, which adds a sense of practicality and beauty to modern architectural decoration.

The aluminum profile series is very directional, transparent and open, with a strong three-dimensional sense, clear edges and corners, novel and unique. The visual height of the decorative space can be adjusted, with various colors, different hanging heights, and different lighting effects are introduced to complement each other, showing a bright, elegant, fashionable and harmonious decorative style.

With the installation structure of the windproof code, it can effectively prevent the wind from being used in outdoor decoration, and the effect is more vivid. Transparent installation method, easy and quick to assemble and disassemble.

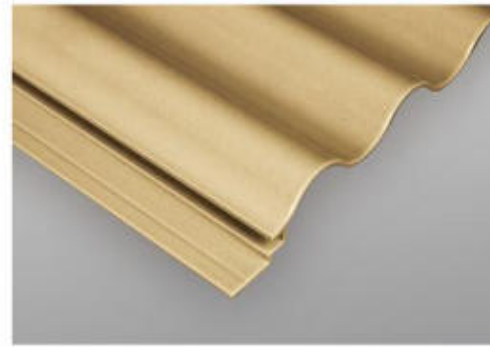

# WAVE Board

## 波浪板

### 产品介绍 Product description

波浪板是一种新型时尚艺术室内装饰板材。本饰材主要应用于宾馆、会所、家居装饰、歌舞厅、度假村、商场、豪宅、别墅等装饰工程，特别适合于设计门庭、玄关、背景墙、电视墙、廊柱、吧台、门、吊顶、展架。可代替天然木皮、贴面板等。造型优美、工艺精湛、结构均匀、立体感强、绿色环保、时尚高贵的特性深受广大消费者的喜爱。同时可根据客户需求，订做不同图案、颜色、造型。

Wave board is a new type of fashion art interior decoration board. This decoration material is mainly used in hotels, clubs, home decoration, song and dance halls, resorts, shopping malls, luxury houses, villas and other decoration projects, especially suitable for the design of atrium, porch, background wall, TV wall, corridor column, bar, door, ceiling and exhibition frame. It can replace natural wood veneer, veneer, etc. The characteristics of beautiful shape, fine technology, uniform structure, strong three-dimensional sense, green environmental protection, fashion and nobility are deeply loved by the majority of consumers. At the same time, different patterns, colors and shapes can be customized according to customer needs.

波浪板是一种饰面板材，它的表面造型类似起伏的波浪，由于模仿波浪的纹理，动态的波浪在静止的饰面板上就延伸出不少造型，纹理十分丰富。

The wave board is a kind of veneer board. Its surface shape is similar to undulating waves. Due to the imitation of the texture of the wave, the dynamic wave extends a lot of shapes on the static veneer, and the texture is very rich.

## GREAT Wall plate

### 长城板

#### 产品介绍 Product description

长城板是一种新型时尚的艺术装饰板材，具有流畅的波状外形，能满足各类传统或现代的建筑设计风格。波状设计同时也体现声学要求，犹如一曲曼妙的奏乐。

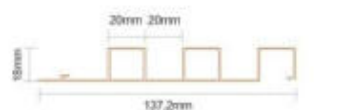

#### 独具一格：

独特的延展性使得材料便于弯曲而不会变形，更不会破坏表面的涂层。整体装饰效果佳，绿色环保，防水、防潮性强，深受广大客户的青睐。

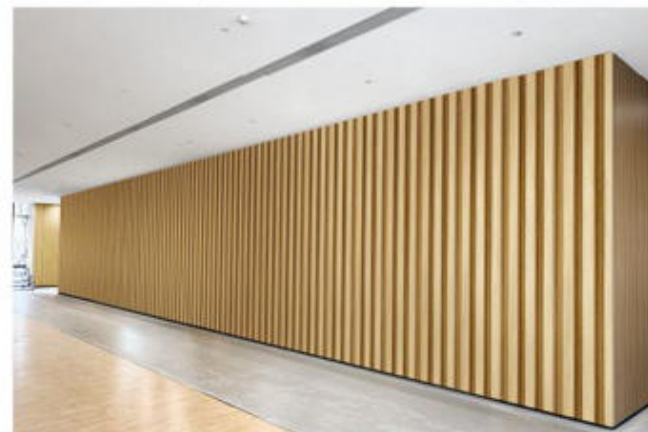

Great wall board is a new and fashionable art decorative board with smooth corrugated shape, which can meet all kinds of traditional or modern architectural design styles. The corrugated design also reflects the acoustic requirements, just like a graceful music.

#### Unique:

The unique ductility makes the material easy to bend without deformation, and will not damage the surface coating. The overall decoration effect is good and green. It is highly waterproof and moisture-proof, and is favored by customers.

装配图

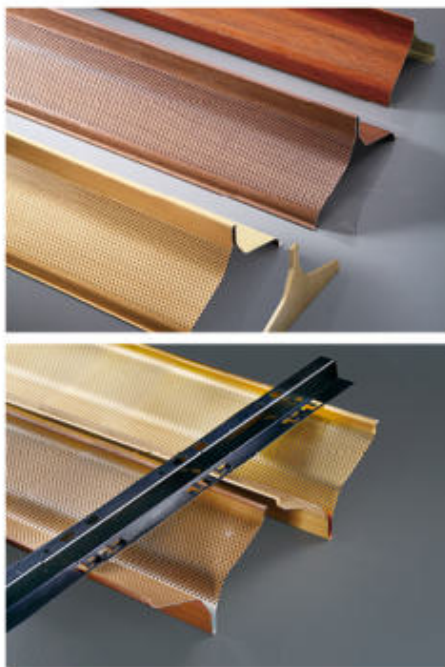

## V-SHAPED Clip

### V 型挂片

#### 产品介绍 Product description

V 型天花是一种装饰性垂直帘吊顶天花，周边线条明快柔和，立体感超强，整体通透、祥和，色泽丰富，具有隔音、散热、防风性能，选用适当的高度，以适当 V 型挂片视觉角度，能产生幕布效果，使得设计变化万千，效果美观。

V-shaped ceiling is a kind of decorative vertical curtain ceiling. The round-edged lines are bright and soft, the three-dimensional effect is super strong, the whole is transparent, peaceful, and the color is rich. It has the performance of sound insulation, heat dissipation and wind resistance. The visual angle of the V-shaped hanging piece can produce a curtain effect, which makes the design changeable and the effect is beautiful.

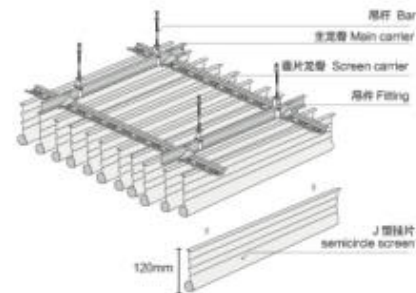

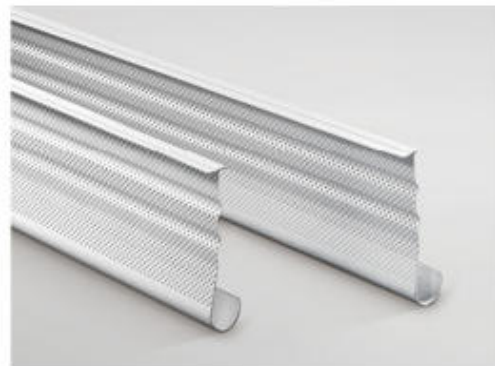

#### 产品介绍 Product description

J 型挂片天花采用单向条板安装，形成单向屏视觉效果；线条明快飘逸，选用适当的高度，以适当视觉角度，能产生幕布效果；其维修限制较少，令设计变化万千，整个建筑空间宽敞通透。

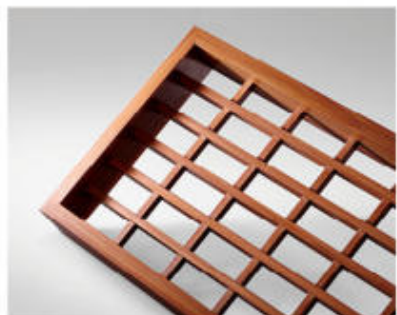

广泛应用于写字楼、酒店、停车场、地铁站、车站、机场、大型购物广场等。

The J-shaped hanging piece ceiling is installed with one-way slats to form a one-way screen-level vision; the lines are bright and elegant, the appropriate height is selected, and the appropriate visual angle can produce a curtain effect; its maintenance restrictions are less, which makes the design change. The whole building space is wide and transparent. It is widely used in office buildings, hotels, parking lots, subway stations, stations, airports, large shopping places, etc.

# ALUMINUM Window grilles/screens

## 铝窗花 / 铝屏风

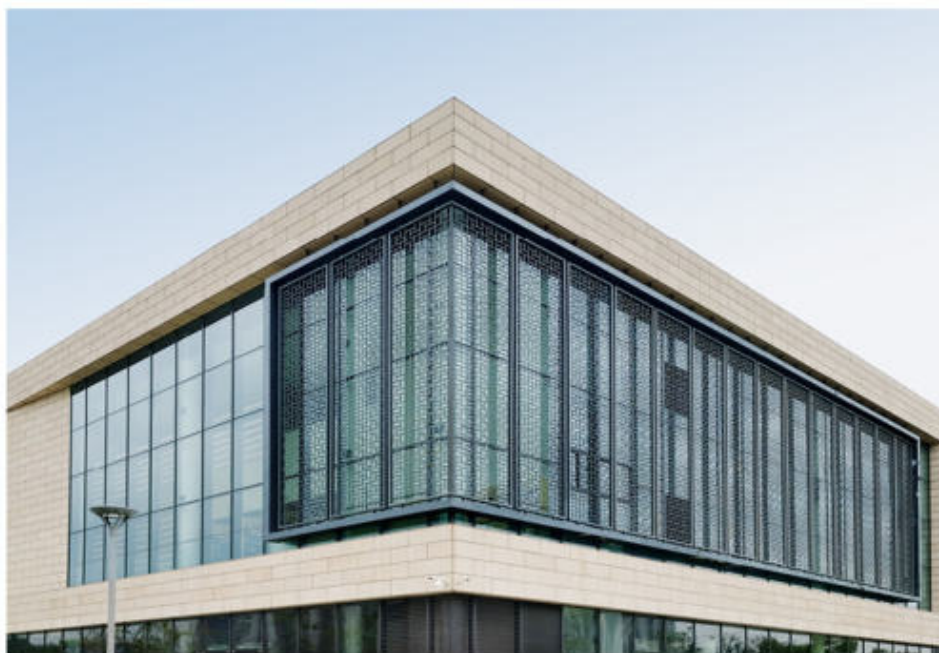

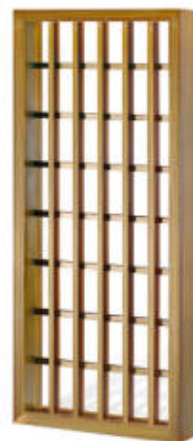

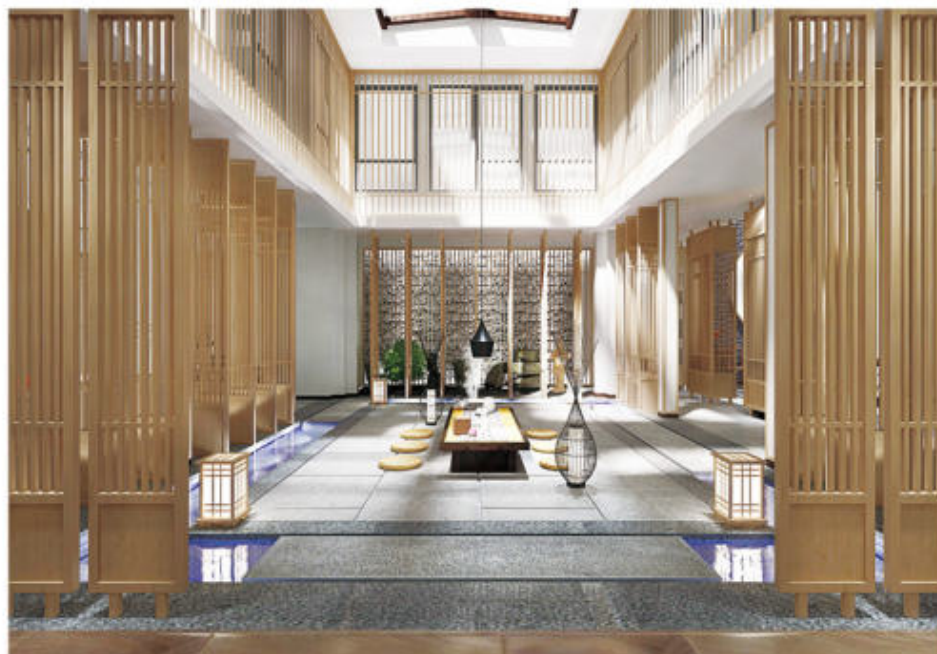

### 产品介绍 Product description

铝窗花是由优质铝材和扁条制作而成的新型防盗网，起到窗户、阳台防护和防盗作用。因可以设计成类似窗花的花纹，赢得各铝窗花。产品是采用高强度的优质铝型材精制而成，产品设计新颖时尚、简约耐用。铝窗花又称之为港式窗花，是一种由香港引进大陆的新型防盗网，是传统铁制、不锈钢防盗网的升级产品。铝窗花全铝制作无焊焊接，手工与机器相结合，可选颜色，安装简单。虽然铝窗花是一种流行的新型产品，部分城市依然处于真空状态，因此商业潜力很大。

Aluminum window sash is a new type of anti-theft net made of high-quality aluminum materials and flat strips, which plays the role of window and balcony protection and anti-theft. Because it can be designed into a pattern similar to window flower, it is named aluminum window flower. The product is made of high-strength high-quality aluminum material. The product design is novel, fashionable, simple and durable. Aluminum window sash, also known as Hong Kong Style window sash, is a new anti-theft net introduced from Hong Kong to the mainland. It is an upgraded product of traditional iron and stainless steel anti-theft net. Aluminum window sashes are made in the whole process without welding, combined with manual and machine, optional color and simple installation. Although aluminum window is a popular new product, some cities are still in a vacuum, so there is great commercial potential.

### 应用领域 Application field

适用于酒店、商场、商业建筑、行政楼、超市等各种公共场所。  
It is suitable for hotels, shopping malls, commercial buildings, administrative buildings, supermarkets and other public places.

## ALUMINUM *Air conditioner cover*

### 铝空调罩

#### 产品介绍 Product description

铝合金空调罩的生产由下料、镂空、折弯、焊接、打磨、表面处理、组装等多道工序组成。产品呈现各种几何形状，可实现各种复杂造型的加工，而表面处理工艺流程也较为重要。表面涂层很大程度上决定了铝空调罩的使用寿命，表面涂层的铝空调罩可能 2-3 年就褪色了，而优质的铝空调罩涂层起码可以使用 8 年以上。

The production of aluminum alloy air conditioner covers consists of blanking, hollowing, bending, welding, grinding and surface treatment. Multi-step forming processes with its assembly make the product take on a variety of geometric shapes, which can easily achieve a variety of complex shapes. The processing of the plate shapes, and the surface treatment process is also more important. Surface coating to a large extent determines the service life of the aluminum air conditioner cover, and the aluminum air conditioner cover with poor surface coating may be broken in 2-3 years at best, and the high-quality aluminum air conditioner cover coating can be used for at least 8 years.

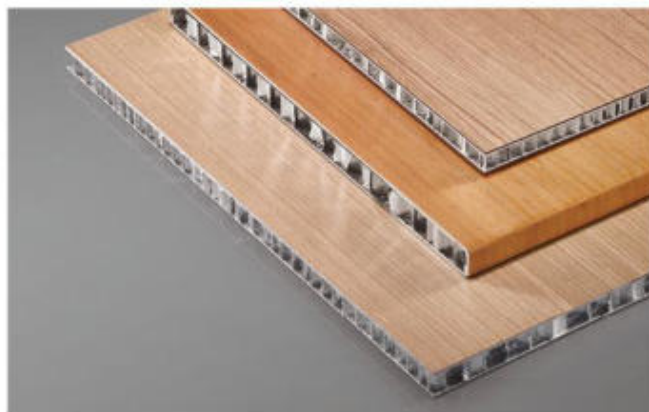

# ALUMINUM Honeycomb panel

## 铝蜂窝板

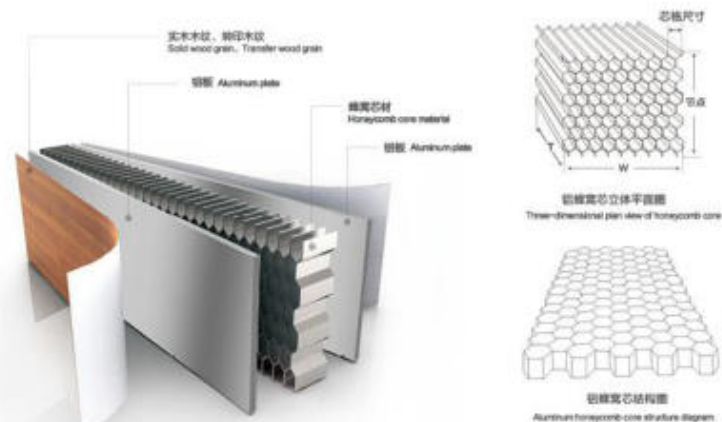

### 产品介绍 Product description

铝蜂窝铝板已被广泛应用于大厦天花装饰。具有相同刚度的蜂窝夹层铝单板重量仅为普通铝板的1/5，钢板的1/100。总厚度为15mm，面板为1.0mm，底板为0.8mm的蜂窝铝板，每平方米的重量仅为6公斤。相互连接的蜂窝芯就如无数个工字钢，芯层分布固定在两个板面内，不易产生剪切，能抗弯扭和抗压。其抗风压大大超过铝塑板和铝单板，即使蜂窝铝板尺寸很大，也能达到很高的平整度。复合蜂窝铝板以最小的重量达到最大的强度和刚度，是其他材料不可比拟的优势，是目前建筑业首选的轻质材料。

Aluminum honeycomb aluminum panels have been widely used in building ceiling decoration. The weight of the honeycomb sandwich aluminum plate with the same stiffness is only 1/5 of the ordinary aluminum plate and 1/100 of the steel plate. The total thickness is 15mm, the panel is 1.0mm, and the bottom plate is a honeycomb aluminum plate of 0.8mm, and the weight per square meter is only 6 kg. The interconnected honeycomb cores are like countless I-beams. The core layers are distributed and fixed in the entire board surface, which is not easy to shear, and can resist bending and compression. Its wind pressure greatly exceeds that of aluminum composite panels and aluminum veneers. Even if the honeycomb aluminum panel is large in size, it can achieve a high level of flatness. The composite honeycomb aluminum panel achieves the maximum strength and deflection with the minimum weight, which is an incomparable advantage of other materials, and is currently the preferred lightweight material in the construction industry.

### 铝蜂窝板产品结构 Aluminum honeycomb panel product structure

# CONCEALED Square plate

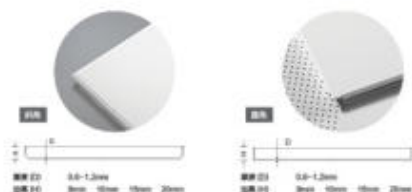

## 暗架方板

### 产品介绍 Product description

暗架方板板面平整无缝，拼接无缝，风格鲜明，色彩丰富，款式多样，经久耐用，品质优良，高贵典雅，具有完美的吸音效果，也可方板和长条板组合使用。

板面平整，棱线分明，吊顶系统体现出整齐、大方、富贵高雅、视野开阔的外观效果。铝扣板具备阻燃、防腐、防潮的优点，而且拆装方便，每件板均可独立拆装，方便施工和维护。如需调换和清洁吊顶面时，可用磁性吸盘或专用拆板器快速取板，也可在穿孔板背面覆加一层吸音面纸或黑色阻燃棉布，能够达到一定的吸音标准。

适用范围：高级写字楼、学校、办公室、走廊、车站、厂房、医院、会所、银行、商场、展览馆等建筑。

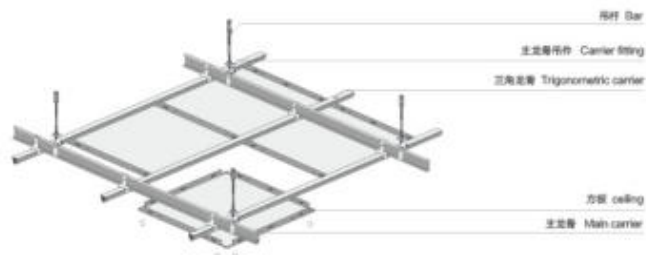

The surface of the concealed square board is flat and traceless, the splicing is seamless, the style is bright, the color is rich, the style is diverse, durable, the quality is excellent, noble and elegant, and has perfect sound-absorbing effect. It can also be used in combination with square board and long board.

The board surface is flat, the edges and lines are clear, and the ceiling system reflects the appearance effect of neat, generous, rich and elegant and broad vision. Aluminum gusset plate has the advantages of flame retardant, anti-corrosion and moisture-proof, and it is easy to assemble and disassemble. Each plate can be disassembled and assembled independently, which is convenient for construction and maintenance. If you need to replace and clean the ceiling panel, you can use a magnetic suction cup or a special plate remover to quickly remove the plate, or you can cover the back of the perforated plate with a layer of sound-absorbing tissue paper or black flame-retardant cotton cloth, which can meet a certain sound-absorbing standard.

Scope of application: senior office buildings, schools, offices, corridors, stations, factories, hospitals, clubs, banks, shopping malls, exhibition halls and other buildings.

### 安装结构 Installation structure

# OPEN FRAME Square plate

## 明架方板

### 产品介绍 Product description

明架天花由装饰面板、明骨、上层轻钢主龙骨以及相关配件共同构成。板面平整，棱线分明，吊顶系统规整、大方、典雅、视野开阔。明架天花具备阻燃、防腐、防潮的优点，而且拆装方便，每件板均可独立拆装，方便施工、维护和清洁。

适用范围：高级写字楼、办公室、走廊、机场、车站、厂房、医院、会所、银行、商场、学校、展览馆等。

表面处理：聚酯、粉末、转印、滚涂。

The open frame ceiling is composed of decorative panel, open bone, upper light steel main keel and relevant accessories. The board surface is flat, the edges and lines are clear, and the ceiling system is regular, generous, elegant and has a wide field of vision. The open frame ceiling has the advantages of flame retardant, anti-corrosion and moisture-proof, and it is easy to assemble and disassemble. Each plate can be disassembled independently, which is convenient for construction, maintenance and cleaning.

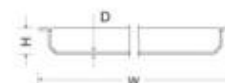

Scope of application: senior office buildings, offices, corridors, airports, stations, factories, hospitals, clubs, banks, shopping malls, schools, exhibition halls, etc.

Surface treatment: polyester, powder, transfer printing, roll coating.

# SURFACE Treatment

## 表面处理

### 氟碳铝板 Fluorocarbon aluminum plate

适用于金属、木材、塑料、装饰板材、标志性建筑等的表面装饰保护，以及建筑外墙仿金属幕墙的幕墙。一般要经过前处理流程、氟碳喷涂流程。其中前处理流程就是要经过多次的清洗、化学处理以便增加涂层和金属表面结合力和防氧化能力，利于延长漆膜的使用寿命。而氟碳喷涂流程则要经过三次喷涂（简称三喷，喷底漆、面漆及罩光漆）和二次喷涂（底漆、面漆）的工序。

Paint is suitable for decorative protection of metal, wood, plastic, decorative plate, landmark buildings, etc., as well as the finish of imitation metal curtain wall of building exterior wall. Generally, it has to go through the pre-treatment process and the fluorocarbon spraying process. The pre-treatment process is to go through multiple cleanings and chemical treatments in order to increase the adhesion between the coating and the metal surface and the anti-oxidation ability, which is beneficial to prolong the service life of the paint film. The fluorocarbon spraying process has to go through three spraying (referred to as three spraying, spray primer, topcoat and finish paint) and secondary spraying (primer, topcoat).

### 阳极氧化 Anodizing

阳极氧化是指金属或合金的电化学氧化，铝及其合金在相应的电解液和特定的工艺条件下，由于外加电流的作用下，在铝制品（阳极）上形成一层氧化膜的过程。阳极氧化不但可以解决铝表面硬度、耐磨损性等方面的缺陷，更能延长铝的使用寿命并增强美观度，已成为铝表面处理不可缺少的一环，是目前应用最广泛且非常成功的工艺。

### 热转印木纹铝板 Heat transfer wood grain aluminum plate

在铝板或铝型材表面进行氟碳喷涂的基础上采用木纹膜，经抽真空处理，将木纹膜印到铝板的氟碳涂层上的一种高档金属装饰材料。采用国际先进新型图纹装饰材料，图案高档华丽，色泽纹理逼真，图案牢固耐晒，不含甲醛、无毒、无有害气体释放，无须为装饰后油漆和胶类物质带来的异味及身体伤害而担忧，品质卓越。是高档建筑装饰的首选材料。

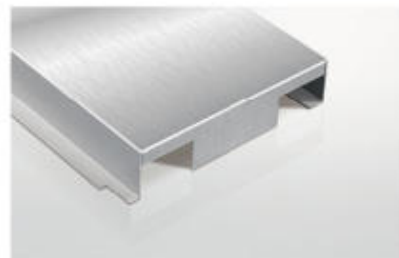

On the basis of fluorocarbon spraying on the surface of aluminum plate or aluminum profile, wood grain film is used, and after vacuum treatment, the wood grain film is past printed on the fluorocarbon coating of aluminum plate, a high-grade metal decorative material. Using international advanced new pattern decoration materials, the pattern is high-grade and gorgeous, the color and texture are realistic, the pattern is firm and wear-resistant, no formaldehyde, non-toxic, no harmful gas release, no need for odor and body after decoration paint and glue substances. Worry about injury, excellent quality, is the preferred material for high-end architectural decoration.

### 拉丝铝板 Brushed aluminum veneer

在铝板拉丝制程中，阳极处理之后的特殊的皮膜技术，可以使铝板表面生成一种含有该金属成分的皮膜层，清晰显现每一根细微丝纹，从而使金属光泽中透出细密的发丝光泽。越来越多的铝板产品的金属外壳都使用了金属拉丝工艺，以起到美观、抗腐蚀的作用。

In the aluminum sheet drawing process, the special film technology after anodizing can make a film layer containing the metal component on the surface of the aluminum sheet, and clearly show every fine wire mark, so that the metal matrix shines with fine hair. Silky shaven. More and more metal shells of aluminum plate products use metal wire drawing technology to play a beautiful and anti-corrosion role.

### 彩绘铝板 Painted aluminum veneer

将透明的UV漆喷涂或滚涂在板材表面，再经过UV光固化机干燥而形成，具有环保、不褪色、耐摩擦、耐酸碱、抗腐蚀等特点。表面丰满平滑，质感细腻，闪烁着美丽的光泽，令居室明媚动人，渲染出雅致的生活。

The transparent UV paint is sprayed or rolled on the surface of the sheet, and then dried by a UV light curing machine. It has the characteristics of environmental protection, non-fading, scratch resistance, acid and alkali resistance, and corrosion resistance. The surface paint film is plump, the texture is smooth, and the beautiful luster shines, making the room bright and moving, rendering a delicate life.

### 仿大理石纹铝板 Imitation marble pattern aluminum plate

仿真手感及石纹喷涂纹理逼真、质感细腻，仿如天成，环保无毒，且易于清洁；裂纹喷涂和仿古喷涂满足家居装饰要求，尽显高贵典雅。

The simulated hand feel and stone pattern spraying have realistic texture and detached texture, just like heaven, and the essence of environmental protection is obvious; crack spraying and antique spraying meet the requirements of home decoration, showing nobility and elegance.

### 真石漆铝板 Real stone painted aluminum plate

真石漆铝板装饰性强具有仿天然石材、大理石、花岗岩的厚度肌理涂料。自然色泽，具有天然石材的质感，各种线格设计，能提供各种立体形状的花纹结构，能从视觉上彰显整个建筑的高雅与庄重之美，是外墙干挂石材最佳替代品。

The real stone paint aluminum plate is highly decorative and has a thick build-up coating that imitates natural stone, marble and granite. Natural color, with the texture of natural stone, various line grid designs, can provide various three-dimensional shapes of pattern structures, can visually demonstrate the elegance and solemn beauty of the entire building, and is the best substitute for dry hanging stone on exterior walls.

## ENGINEERING Case

### 工程案例

建筑艺术与其他造型艺术一样，它主要通过视觉给人以美的感受。同时，建筑艺术是一种立体艺术形式。故建筑艺术形象具有特殊的反映社会生活、精神面貌和经济基础的功能。

Like other plastic arts, architectural art mainly gives people the feeling of beauty through vision. At the same time, architectural art is an appropriate form of art, so the image of architectural art has a special function of reflecting social life, spiritual outlook and economic foundation.

建筑艺术，是一种实用性与审美性相结合的艺术。建筑的本质是人类建造以供居住和生活的生活场所，所以，实用性是建筑的重要功能；只是随着人类实践的发展，物质技术的进步，建筑越来越具有审美价值。

Architectural art is an art that combines practicality and aesthetics. The essence of architecture is a living place built by human beings for living and activities. Therefore, practicality is the primary function of architecture; but with the development of human practices and the advancement of material technology, architecture has become more and more aesthetic value.

## ENGINEERING

Case

### 工程案例

## ENGINEERING

Case

### 工程案例

城市轨道交通的装修设计要素形、色、质这三种视觉元素要满足功效结合、维护经济利益、识别性、艺术效果、快速施工、造价经济等要求，国内大部分地铁站装修都是标准化和个性化的有机统一。

The visual elements of shape, color and quality in the decoration design of urban rail transit must meet the requirements of combination of functions, maintenance of economic interests, identification, artistic effect, rapid construction, and cost economy. Most of the decoration of domestic subway stations are standardized and personalized organic unity.

## ENGINEERING Case 工程案例

每一座精湛的建筑都承载着伟大的梦想，每一滴汗水托举着工匠们的荣耀和光芒，每一项成功案例是对建筑者们最大的肯定！  
一座座城、一幅幅美景，见证着成长与付出，相信所有平凡亦不朽的杰作，都刻画着劳动者心中永恒的丰碑！

Every exquisite building carries a great dream, every drop of sweat entrusts the glory and light of the craftsmen, and every successful case is the greatest affirmation to the builders!

Every city and every beautiful scene witnesses growth and dedication. I believe that all ordinary and immortal masterpieces depict eternal monuments in the hearts of laborers!
